

Kuwait Specialized Eye Center

Kuwait City (Kuwait)

The Kuwait Specialized Eye Center (KSEC) was established in 2013 as the nation's first eye hospital and has grown into one of the world's premier eye care facilities. Their clinical expertise, state-of-the-art diagnostic testing and advanced surgical capabilities make Kuwait Specialized Eye Center a worldwide referral center where more than 250,000 patients are treated annually.

Haelvoet has delivered several furniture items for the KSEC: both Care and Hospital beds, bariatric furniture, bedside tables and reading tables. Split up into multiple care units (including day case patient wards and private suites), our furniture comes out very well in the KSEC, where skilled physicians and staff are dedicated to improving and preserving sight.

Founder: Doctor Khalid Sabti

Project scope: 23 rooms (day case patient wards and private suites)

Date: Summer 2013
